**Tuesday, 11 December 2007
6:00 - 8:00 PM**

UNFCCC – COP 13 / MOP 3 Side Event
Inna Putri Bali Hotel, next to the Grand Hyatt
Nusa Dua

"Regional experience and information on nuclear energy – scientists, witnesses, and activists speak out"

Whenever the price of oil per barrel raises another few dollars, access to gas is insecure or an alarming climate study is published – the call, in some quarters for more nuclear power gets louder.

But is that the right call?

Scientists, witnesses and activists from WECF partner and member organisations from different regions of the world, share their knowledge and experience.

The panel:

- **"Health impacts near nuclear power plants confirm the accuracy of Germany's decision to phase out nuclear energy"** –
Karin Wurzbacher, physicist and nuclear energy expert, Umweltinstitut München, Germany
- **"Experiences from Mayak and Chernobyl – lessons have not been learned"** –
Natalia Manzurova, scientist on radiobiology, citizen of the closed city of Ozersk, Russia, and clean-up worker in Chernobyl, The Planet of Hopes, Ozersk, Russia
- **"Health effects of uranium mining in Ukraine"** -
Svitlana Slesarenok, testimonial, Black Sea Women's Club, Odessa, Ukraine
- **"Stopping the Renaissance of nuclear power in the US and the world – again"** -
Claire Greensfelder, energy activist, International Forum on Globalization and INOCHI/Plutonium Free Future, San Francisco, California, USA

introduction and moderation by

- Sabine Bock, Energy Coordinator WECF – Women in Europe for a Common Future
- Christina Hacker, Umweltinstitut München, Germany
