

Toy tests

Labor für Umweltanalytik
und Arbeitssicherheit
Wolfgang Döring

Sharp corners and edges

- Scooters
- Tin toys
- Wooden toys

*Kinderroller - Scooter X-large, Manufacturer: Cycletrack,
Article No BZ2911, Rapex Week 40-2009, Risk of injury*

Halogenated compounds (chlorinated hydrocarbons)

- Beilstein test:
copper + flame

= green flame in
presence of
halogens
(chlorine, fluorine)

Problem

- Plasticizers:
there are currently no rapid tests
available
- Flame retardants:
Beilstein test in case of fluorinated,
bromiated or chlorinated compounds

Plastic tests

- Flame test
 - Beilstein test
 - Swimming test
 - pH test
- For the color scheme of the universal indicator different agents are used, which change color with each different pH values.
Such pH indicators are
 - Litmus: pH < 4,5 = red, pH > 8,3 = blau
 - Phenolphthalein: pH < 8,2 = colorless, pH > 10,0 = pink
 - Methyl Orange pH < 3,1 = red, pH > 4,4 = yellow
 - Bromothymol blue: pH < 6,0 = yellow, pH > 7,6 = blue

Formaldehyde tests

- Dräger test tube
- Tests with test chamber
- Acetyl-Aceton method

Noise test

- Decibel measurement on the headphones with a simple sound-level meter (about 30 €)
